Data Sheet

STYROKLENS

Expanded Polystyrene Solvent Emulsifier

STYROKLENS is a specially formulated solvent developed to safely dissolve away and emulsify unwanted expanded polystyrene box outs, void formers and inserts.

Simply apply **STYROKLENS** to the expanded polystyrene and observe as the **STYROKLENS** visibly eats away and dissolves the expanded polystyrene without adversely affecting the surrounding concrete. The residue can then be easily wiped or washed away with a damp cloth and clean water.

Application

Use in a well ventilated area. By far the easiest method of application is to apply **STYROKLENS** to the unwanted expanded polystyrene by brush although other methods can be used. Apply carefully as only small quantities of **STYROKLENS** are necessary to dissolve quite large volumes of expanded polystyrene. Whilst the residue is still in liquid form wash off with clean water and wipe with a damp cloth. If residue has not been cleaned off promptly and it has solidified simply re-activate by reapplying **STYROKLENS** and clean off promptly with clean water.

Physical properties

Appearance: Pale straw low viscosity liquid

Density : @ 15^o C = 0.904

Flash Point : 38^o C

Classification

STYROKLENS is flammable with a flash point around 38°C

Packaging

Available in 5 litre, 25 litre and 205 litre containers.
